

Sharing Personal Contact – MMS

Things you need to know:

This method uses MMS to send and receive.

Messaging “Allowed” must be provisioned on the subscriber account.

Samsung’s messaging app, which is the default messaging app on Samsung devices, limits the v-card to 50 contacts.

Google’s messaging app, which is the default on CAT and Sonim does not have this limitation to 50 contacts.

How do I share my personal contacts?

Step 1: Add all current contacts with correct name on a handset.

Step 2: Go to Contacts

- Press menu button at the top left and choose Select
- Boxes will show by names
- Choose from top left menu button Select All
- Then choose menu button SHARE
- Type in all names of all users to send a text message with contacts to
- Then choose menu send
- (Note: there may be a requirement to limit to send to 10 users at a time)

Step 3: The phones you are sending the contacts to need all contact deleted on their handset so that duplicate do not occur on the list. Do this before loading new contacts.

How to Delete Contacts:

- Go to Contacts
- Press Menu button at the top left and choose SELECT
- Boxes will show by names
- Choose from top left menu button Select All
- Then choose menu button Delete

Loading Contacts:

Open text message with the vCard, use the button in the middle of the arrows in the center of the handset to select **Contacts**

They will populate in the phone after the enter button on highlighted vCard.
